PROFESSIONAL SUMMARY

Senior Full-Stack Developer with 10+ years of experience building business software, SaaS platforms, multi-branch POS systems, web and mobile applications, APIs, automation and third-party integrations. Strong background in PHP, Laravel, MySQL and JavaScript, with experience in database architecture, technical leadership, ARCA electronic invoicing, PWA, web deployment and legacy-system modernization. I use AI-assisted development tools to improve productivity across coding, debugging, refactoring, testing and documentation while maintaining engineering oversight.

CORE TECHNOLOGIES

Backend: PHP · Laravel · REST APIs · C# · Visual FoxPro | Frontend: JavaScript · Vue.js · Blade · Bootstrap · jQuery · HTML5 · CSS3
Databases: MySQL · PostgreSQL · SQLite · DBF · SQL | Mobile/Deploy: Cordova · Android · internal iOS apps · PWA · Netlify · Vercel · Docker · Linux
Integrations: ARCA · WhatsApp · Telegram · Meta · Instagram · Threads · TikTok · X · MercadoPago · Tienda Nube · MercadoLibre | AI: OpenAI Codex · AI-assisted coding

PROFESSIONAL EXPERIENCE

Custom Software Developer | San Nicolás SRL | 2024 - Present

- Develop and maintain custom business systems for internal operations, hair salons and service businesses.
- Built appointment scheduling, customer, employee, service, availability and reservation workflows with WhatsApp and external API integrations.

Stack: PHP · Laravel · MySQL · JavaScript · REST APIs

Full-Stack / SaaS Developer | InstaPOS | 2023

- Developed a multi-branch SaaS platform for agencies and points of sale.
- Implemented POS, commercial management, database architecture and electronic invoicing integrated with Argentina's ARCA.

Stack: Laravel · PHP · MySQL · SaaS · REST APIs · ARCA

Full-Stack / SaaS Developer | ComercioPro - Buenos Aires | 2022

- Built the complete commercial SaaS platform including multi-branch POS, sales, branch management and a referral system.
- Owned end-to-end development across backend, frontend, database and business logic.

Stack: Laravel · PHP · MySQL · JavaScript · SaaS · POS

Software Developer / Technical Lead | Parque Eólico Arauco SAPEM | 2021 - Present

- Designed the central database and coordinated the technical work of multiple educational game developers.
- Designed and developed an API that allowed videogames to submit student scores to the platform.
- Built an administrative tablet application and implemented synchronization with a central server.

Stack: REST APIs · Database Architecture · Client/Server Integration · Technical Leadership

Laravel Developer | Sooft Technology / OYD | 2020 - 2021

- Maintained and enhanced web platforms, including a system for a Swiss company.

Stack: PHP · Laravel · Vue.js

Software Developer | Soldiers Skatehouse | 2015 - 2020

- Developed and maintained business-management software for sales, stock, inventory and operational processes.

Stack: Visual FoxPro 9 · DBF

SELECTED PROJECTS & INTEGRATIONS

- Currently active Android applications built with Apache Cordova; internal iOS applications and Progressive Web Apps (PWA).
- Application and frontend deployment using Netlify, Vercel, traditional hosting and VPS environments.
- In-store and mobile price-checking solutions for clothing and footwear retailers.
- Lottery/quiniela management systems for local businesses with Telegram integrations.
- WhatsApp integrations and API integrations with Meta, Instagram, Threads, TikTok and X.
- Automated content/video generation and multi-platform publishing workflows.
- Experience integrating MercadoPago, Tienda Nube and MercadoLibre, plus REST APIs and external service synchronization.
